HTML / CSS / JavaScript
TypeScript
Node.js + Express
React + Redux
React Native
Next.js
MongoDB
PostgreSQL
Cloud Firebase
Jest / Puppeteer
JSDoc + Swagger
AWS Lambda
Nginx / Apache / Windows Server
GIT

Attention to detail
Problem-solving
Empathetic with colleagues & clients

LANGUAGES

English
Spanish

Confident, reliable developer, proficient at independently building, updating & maintaining websites. Ability to creatively & practically solve problems. Excellent at communicating these solutions with a wider team on a global scale. Excited to work with & become a valuable member of an expert team. Friendly introvert.

PROFESSIONAL EXPERIENCE

Lead Developer

Freelance

August 2022 - Present

Just by Emma (WIP)

A team of alumni from Career Foundry joined forces to create an online skincare store. I assumed the role of Lead Developer, remotely supervising UX and UI designers & fellow web developers from around the world. We must all work independently due to time differences yet communicate regularly to keep the project on track. I bridge the gap between designers & developers as I have experience in both.

Web Developer + Designer

Freelance

2015 - Present

mkr-projectmanagement.co.uk

redrosecounselling.uk

On my last two projects, I designed the UI with Figma following the client's brief & coded the React front-end to meet their requirements, using Simple Content Editor as the back-end.

revistava.es

Development & maintenance of the VA! magazine website. My work helped the magazine to gain crowdfunding pledges whilst keeping customers engaged with upcoming content and showcasing the online version of the magazine.

Photographer

Freelance

2010 - Present

Skilled self-starter photographer who manages own time, clients & finances. Most projects require an understanding of the marketing needs of the client. My creativity & attention to detail has produced high quality photographs that are displayed on websites & in print.

EDUCATION

Full-Stack Web Development Program

Career Foundry

February 2020 - September 2021

Intensive project-based training program with a focus on JavaScript & Node.js web development.

Administration of Internet Services (IFCT0509)

FOREM PV

October 2014 - August 2015

Training to manage & administrate servers. Learning about the technologies that move the Internet including HTTP, DNS, SSL, SSH and virtualization. Managing users with Active Directory and troubleshooting through logs and monitoring.

PROJECTS

Ecommerce Node Backend

A custom express server to build an ecommerce online store.

Chat App

Online communication between customers, colleagues and friends is crucial for practically every industry. This project involved designing a React Native mobile application for chat communication. This app allows people to chat, share pictures and locations in a bespoke way.

1kB Website

Challenge to write a one page website with exactly 1024 bytes of size.

eloi.link

An easy to use & fast URL shortener. The HTML code is generated in the server without using any framework. Just vanilla JavaScript template strings. It also accepts API calls to interact with the service.

Simple Content Editor

My own content management system that allows the client to edit text directly on the website using Editor.js. All wrapped in Next.js, a React framework that allows to create SEO friendly websites & integrate the API endpoints in the same project.

Time Travel Films Database

A React project & Express API to browse movies about time travelling

Collaborating Guide

Guide to help new developers to contribute to other GitHub repositories. There are two guides, one for public repositories & another for when you are invited as a collaborator.
